Many an anxious heart in Belleville, Peterborough and other places was comforted on Saturday, when cablegrams were received saying that the 99th Battalion had safely arrived at Plymouth. Although many thousands of troops though many thousands of troops have been conveyed to France, by ships from England and Canada, and from Australia and New Zealand to the Dardneelles, no transports have yet been sunch by German submarines. These vessels are all conveyed by Brish cruisers, and where they are the Huns are always about. They show their braxing and the strength of the impossible for the Navy to give pro-tection to them all. We expect an exception will be made in the case of the Adriatic, on board which ves-sel is Sir Robert Borden, Premier of Canada, who is on an official visit to the Old Country For this rea-son we look for its wafe arrival in port. If any such quesable transaction ever took place it would be the work of others out-side the Cabinet. The balance of Sir Rodmond's vidence is somewhat important. On entering the witness box, and before making any statement, he said "he would like to know to what extent he was privileged and what he would have to disclose. Had not he any privileges in his private and confidential conversa-tions as Premier? Mr. Justice Perdue replied that his advice to the Lieut.-Governor and matters of public policy discussed might be privileged. Sir Rodmond said he did not know a thing of these matters except what was given him in confidence. He had a conversation

with some one, not named, about the

change in Government and the pre-face of this discussion was that what they were discussing was to be absolutely in confidence. Sir Rodmond gave his word that it would. It was agreed that Sir Rodmond should answer questions until the question of privilege arose. HADE IN CANADA A. J. Andrews, who appeared be-ore the Commission on behalf of

his clients, the members of the late nment, who have been sub-ed to give evidence, asked the Commission to give an assurance that no statements they might make would be used against them in any

The plan had received the approval of Chief Jus-tice Howell, and he heard later the Chief Justice had seen the commi

It will be interesting to laymer to learn why a Chief Justice of one of our Superior Courts should be consulted, and his approval sough upon questions affecting the liberty of the subject, the evading of the or the subject, the evading of the provisions of the Controverted Elec-tion Act, and the dropping of an in-vestigation, even for a time, into alleged frauds. The Liberal Press is pursuing the same course as rabidly as do the leaders of the Liberal party on the stump and at party conventions. #### CHIEF JUSTICE HOWELL IN THE WITNESS BOX

Chief Justice Howell appeared in witness box in Winnipeg on 7th inst., and gave his version the 7th inst., and gave his version of the part he played in the graft investigation. It will be for the reader to judge how far he was justified in allowing himself to be interviewed, and in listening to the seductive appeals of the interested parties, and their solicitors.

The interviewers consisted of Mr. Hudson, the present Attorney-Gen-eral, Mr. Phippen, and Chief Jus-tice Howell. The interview, says tice Howell. The interview, says Mr. Hudson, "was private and confidential, and he resented the idea that it had ever been made public. It had strained the relations between one gentleman and himself."

No doubt the Norris Attorney-General, would like to have that little episode in the negotiations ce has not yet transpired.

Tr. Phippen commenced by telling Chief Justice that he was acting Kelly, and did not think it was to go on with the Royal Commis-iavestigation into Kelly's affairs, n it was proposed to institute a Lection.

ontract for the building of the Paragreed with the proposition for de lay, as did also the prosecuting soli-citor for the Government.

It will also be noted that Chief Justice Howell admits that the Lieut.-Governor called upon him and said "I have no confidence in my Attorney-General," that is, the Attorney-General of The Roblin Government, and "I want to know 'my constitutional powers on the

tion of compelling the is "question of compelling the issuing "of a Royal Commission," and that Chief Justice Howell, having look-ed into the question, had satisfied himself it was his duty to tell the On this point, it occurs to

might be brought for adjudication.

That the Lieut.-Governor should tell Chief Justice Howell that he torney-General is not at all surprising; and that he should, make a confidant of Chief Justice Howell in that respect, both being of the Liberal profession, with presumably a strong desire to get rid of the Conservative Government.

The whole proceeding from the beginning to the end is disreputable, and all found guilty of graft, offering to pay or to accept \$50,000 to cover up wrong, should be punished to the fullest extent of the law. This is the opinion, or ought to be, of every honest man who has given the subject a thought.

# McLAUGHLIN "SIX"

The Reason for "Every one a Six"

WO years ago we announced our first McLaughlinsix, and set a standard which is still the despair of competitors. That is history.

Many years of patient and coatly ex-periment were expended before we satis-fied ourselves that the McLaughlin-six had attained the standard which we had set, and which entitled it to the honor of the history costion in the McLaughlin of the highest position in the McLaughlin "family."

Particular purchasers of this 1914 model rantum particular so that size in the more enthusiastically endorsed our claims, and we then proceeded to apply the vast cumulative knowledge gained during those experimental years towards developing the six-cylinder principle in ALL our cars. We have succeeded. Our seven 1916 models—every one a six—uphold the traditions of our 1914-six; they also embody some later refinements in design and construction.

Seven and five-passenger touring cars, large and small runabouts — Every one a six, and all with the famous Valve-in-Head motor.

Noiseless, vibrationless, and powerful-these last expressions of McLaughlin supremacy intensify every proven virtue of automobile sufficiency, and create their own exclusive atmosphere of distinction.

# The Two Piece Suit

THIS is the time of the year when a Man wants to wear as little as possible. If you wear one of our Cool Two Piece Suits, it's certain you won't " Wear a Warried Look"

But there are two considerations in a Two Piece Suit, which call for the most competent Tailoring. In the first place, the Coat must be so tailored as to obviate the need of a Vest. In the second place, as the fabrics are extremely light in weight, the Tailoring must be done with the greatest skill.

Fabrics of carefully selected Sun Proof Serges, Worsted, Homespuns, etc., etc.

If you'll step in and try on one of these Cool Suits and then take a look in the mirror, you'll be surprised to see what a Swell and Comfortable looking Fellow vou arc.

Manitoba was so shattered that it was doomed for generations to the cold shades of Opposition. The late convention, composed of hundreds wince has shattered that fond hope. That the Liberal press should not relish the reorganization under a Leader whose character in every resect is above suspicion, is not a use for wonder or surprise, hence an attempt is being made to belittle and snear at what has been done, and denounce every one who fails to fall into line and follow the new Cabinet. The Globe, following its ingrained habits of condemning every public man of the Conserver tive party, refers to the party as the "Aikins faction," but is obliged to admit that "the planks selected" upon which to test the opinion of the electors "are very good," and then to offset this acknowledgment of a "good" platform, falls foul of of a "good" platform, tails tout of the late leaders of the party, never forgetting the Hon. # The Two Piece Suit

TBIS is the time of the year when a Man wants to wear as little as possible. If you wear one of our Cool Two Piece Suits, it's certain you won't " Wear a Worried Look."

In the second place, as the fabrics are extremely light in weight, the Tailoring must be done with the greatest skill.

Fabrics of carefully selected Sun Proof Serges. Worsted, Homespuns, etc., etc.

If you'll step in and try on one of these Coal Suite and then take a look in the mirror, you'll be surprised

# The Evolution of the McLAUGHIN "SIX" The Reason for "Every one a Six"

WO years ago we announced our first McLaughlinsix, and set a standard which is still the despair of

competitors. That is history. Many years of patient and costly ox-periment were expended before we satiss-fied ourselves that the McLaughline with the distribution of the honor of the highest position in the McLaughlin 'family.'

Particular purchasers of this 1914 model enthusiastically endorsed our claims, and we then proceeded to apply the vast cumulative knowledge gained during those experimental years towards developing the six-cylinder principle in ALL our cars. We have succeeded.

Our seven 1916 models—every one a six—uphold the traditions of our 1914-six; they also embudy some later refinements in design and construction.

Seven and five-passenger touring cars, large and small runabouts — Every one is six, and all with the famous Valvein-Flead motor.

Noiseless, vibrationless, and powerful— these last expressions of McLaughlin supremacy intensify every proven virtue of automobile sufficiency, and create their own exclusive atmosphere of distinction. Canadian GIANTS OF POWER

## The Two Piece Suit

THIS is the time of the year when a Man wants to wear as little as possible. If you wear one of our Cool Two Piece Suits, it's certain you won't "Wear a Warried Look "

If you'll step in and try on one of these Cool Suits and then take a look in the mirror, you'll be surprised to see what a Swell and Comfortable looking Fellow
